

TRUSTLESS WORK

Escrow Infrastructure for the new economy

What is Escrow?

Escrow = a neutral place to hold funds until conditions are met.
Enables trust between strangers:

Real Estate &
high Value txs

upwork

ebay

airbnb

Commerce Is Going Global, but Trust Is still local

- \$2T+ monthly stablecoin volume
 - +40% growth YoY
 - AI-driven commerce emerging
 - 1B+ global freelancers and SMEs transacting digitally
 - Cross-border payments to hit \$250T by 2027
- but**
- Escrow logic is expensive to build
 - Smart contracts require specialized developers and audits
 - Takes months to launch or iterate
 - Most real-world businesses aren't blockchain-native

The Old Way vs. The Hard Way

Escrow Agent
(Traditional / Custodial)

Building your own
(Blockchain / In-House)

Slow onboarding & settlement

Requires blockchain developers

Expensive middlemen & compliance overhead

Slow

Mandatory audits & long build cycles

Jurisdiction-bound

Expensive

Long time-to-market

Manual reporting & limited transparency

Complex

Complex integrations with existing systems

“Centralized trust — zero flexibility.”

Maintenance risk

Trustless Work

“Stripe for Escrows”

Plug-and-play escrow infrastructure
for the stablecoin economy.

Fast — Deploy escrows in minutes, not months

Affordable — 0.3% fees vs. 5–8% legacy

Smart — Milestone-based, programmable payouts

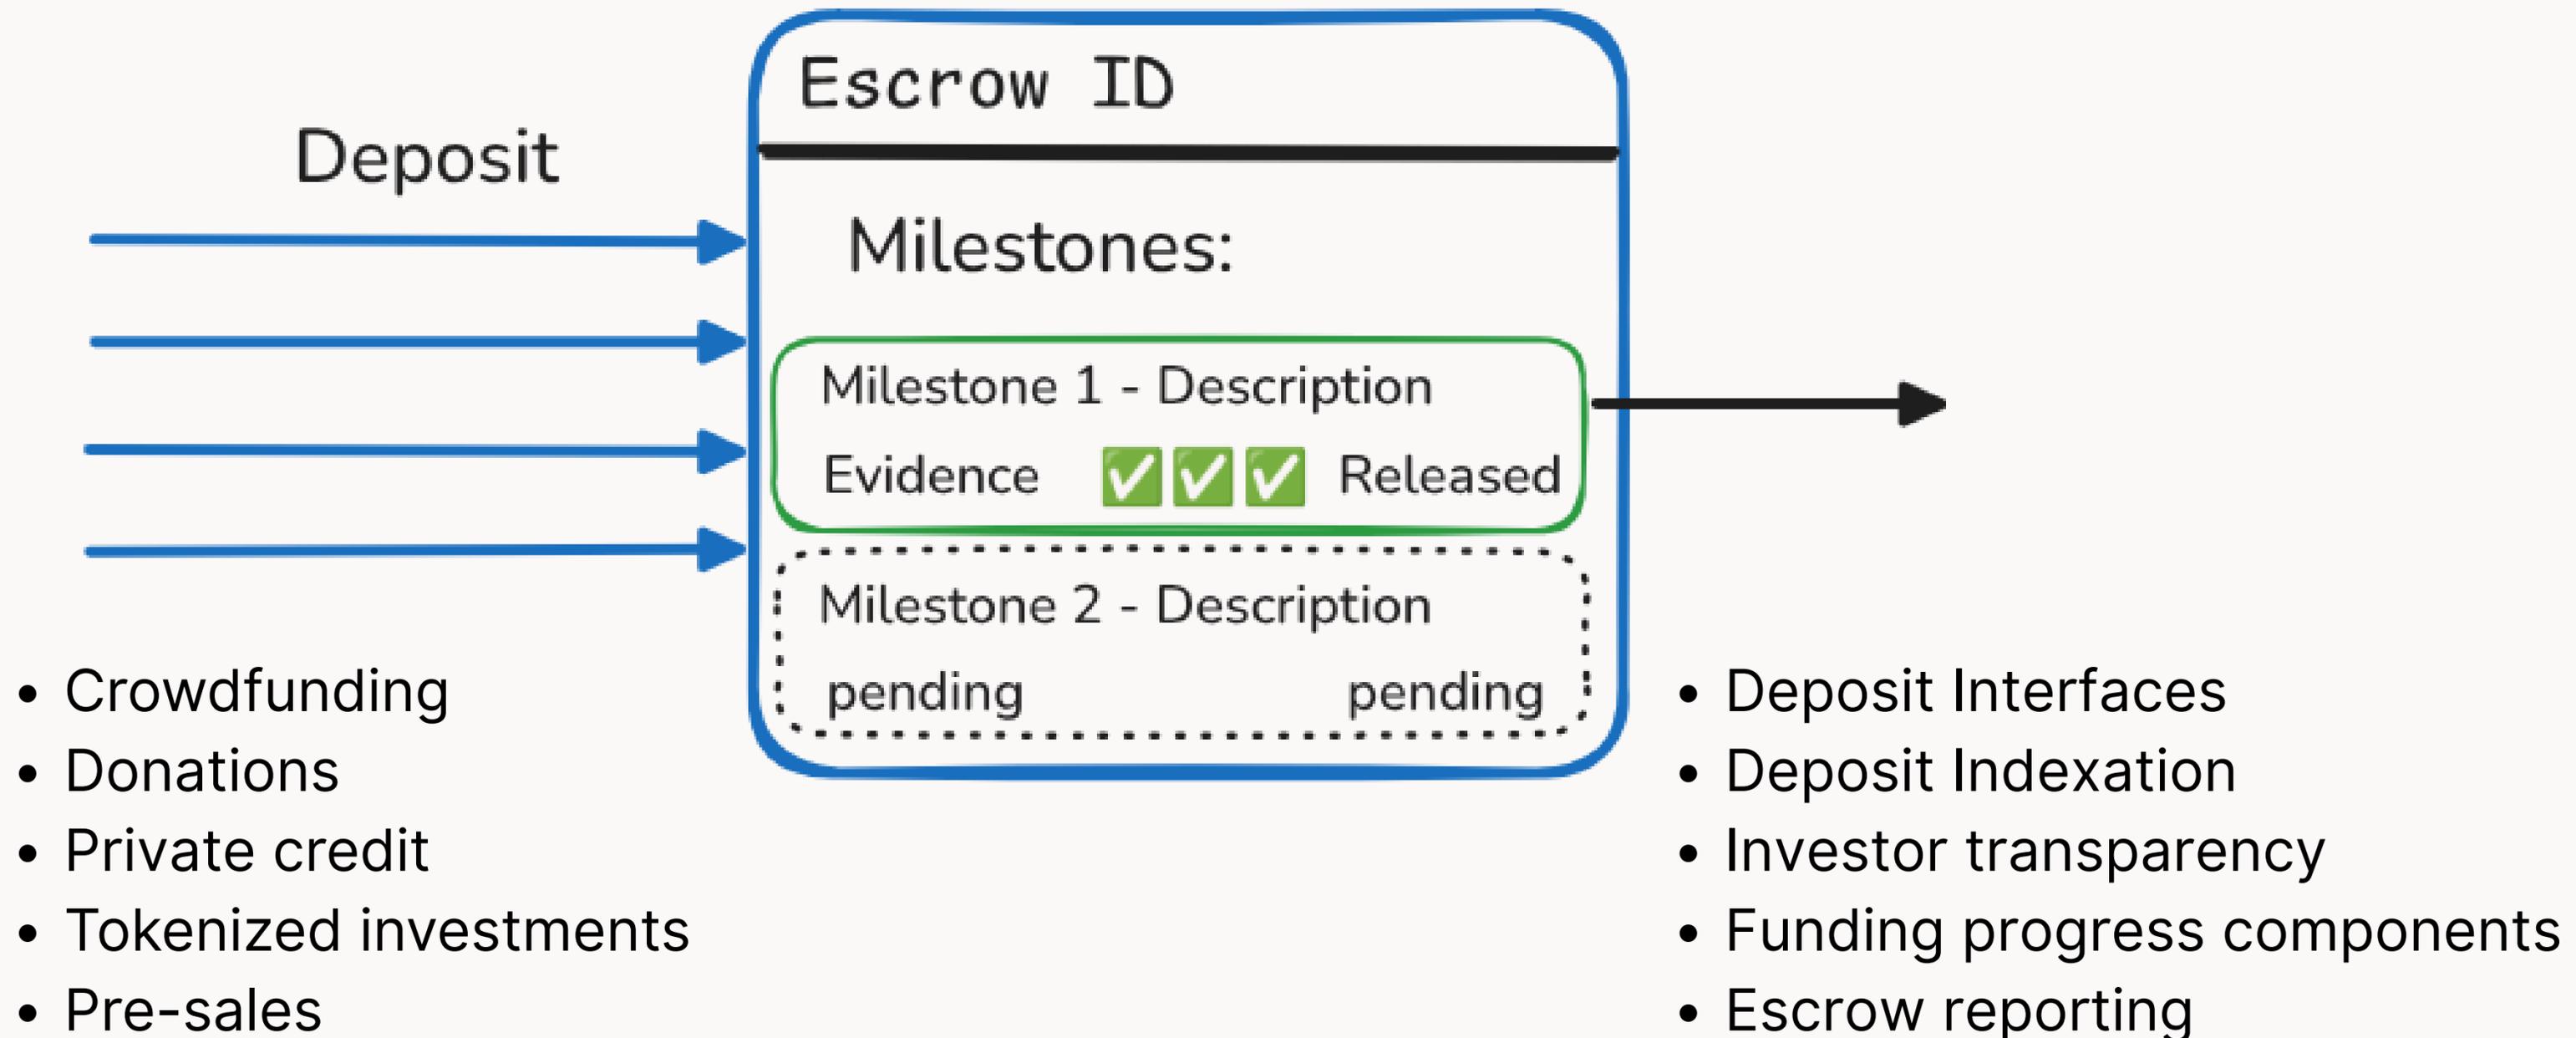

Transparent — Fully auditable on-chain

Non-Custodial — Funds held by code, not people

Soon!

When Capital Comes In → Capturing Funds Transparently

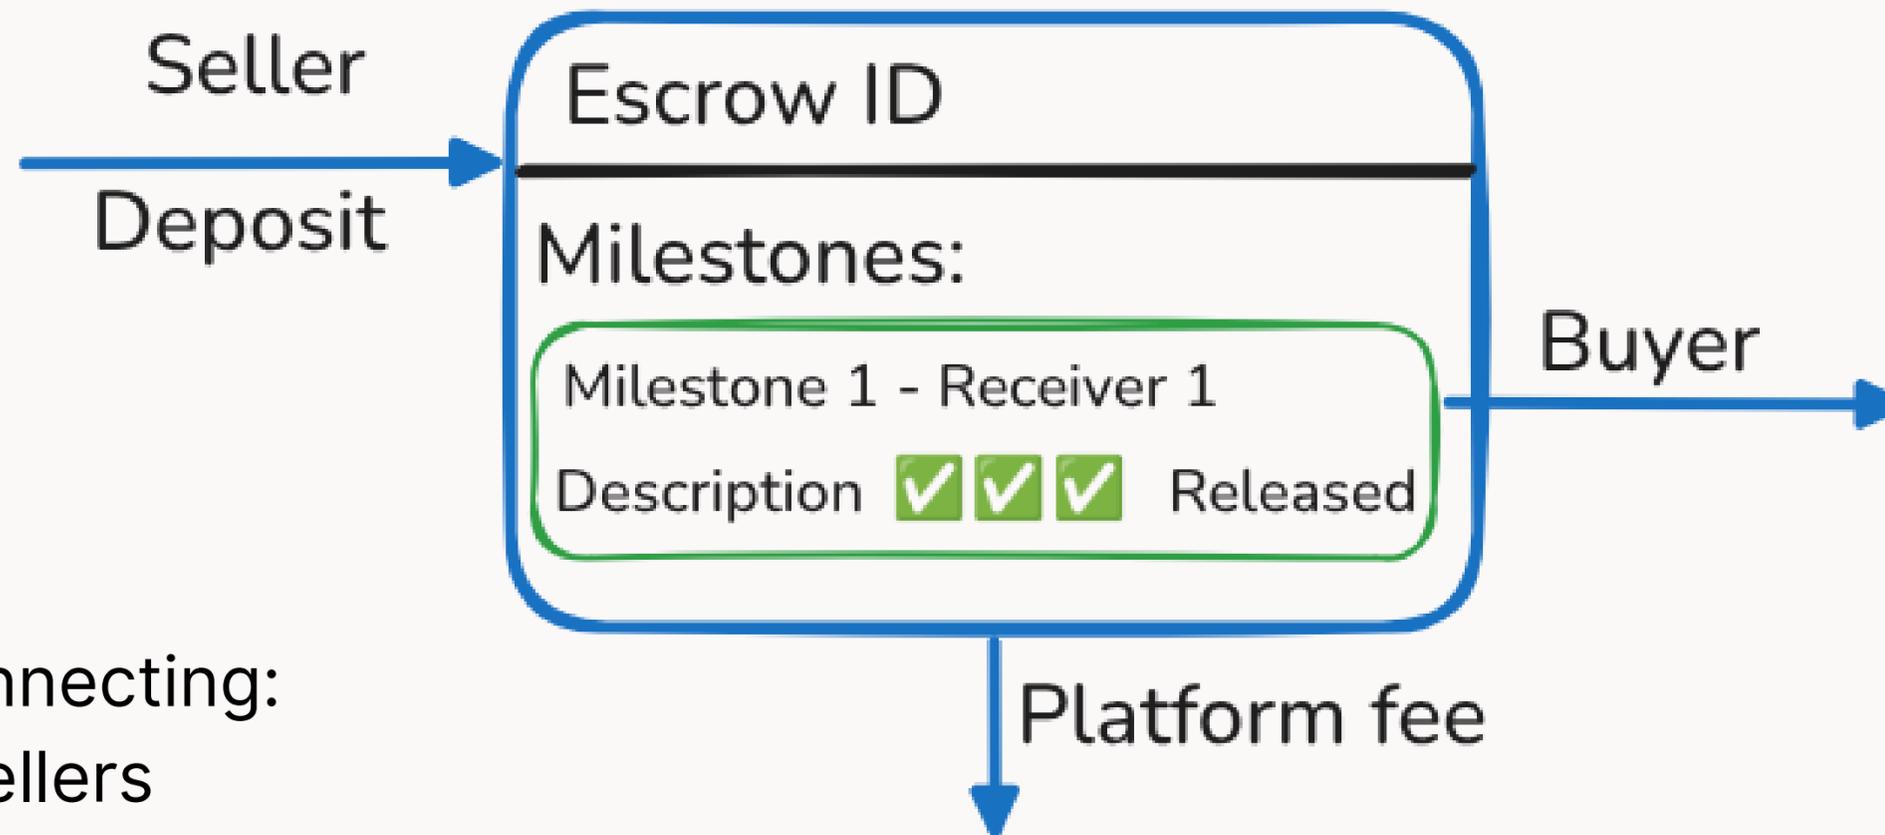

When Capital Flows Out → Paying with Accountability

- Milestone-based payouts Payroll
- Freelance contracts
- Project deliverables
- Grant programs
- Vendor disbursements

- Fully Auditable
- Proof of delivery
- Traceability

When Platforms Sit In Between → Facilitating Without Risk

Platforms connecting:

- Buyers/Sellers
- Investors/Startups
- Clients/Freelancers

Any intermediary that matches but does not want custody

- Neutral trust infrastructure
- Transparent fee collection
- Dispute management
- Revenue/audit oversight

Trustless Work

Go-To-Market: The Innovation Flywheel

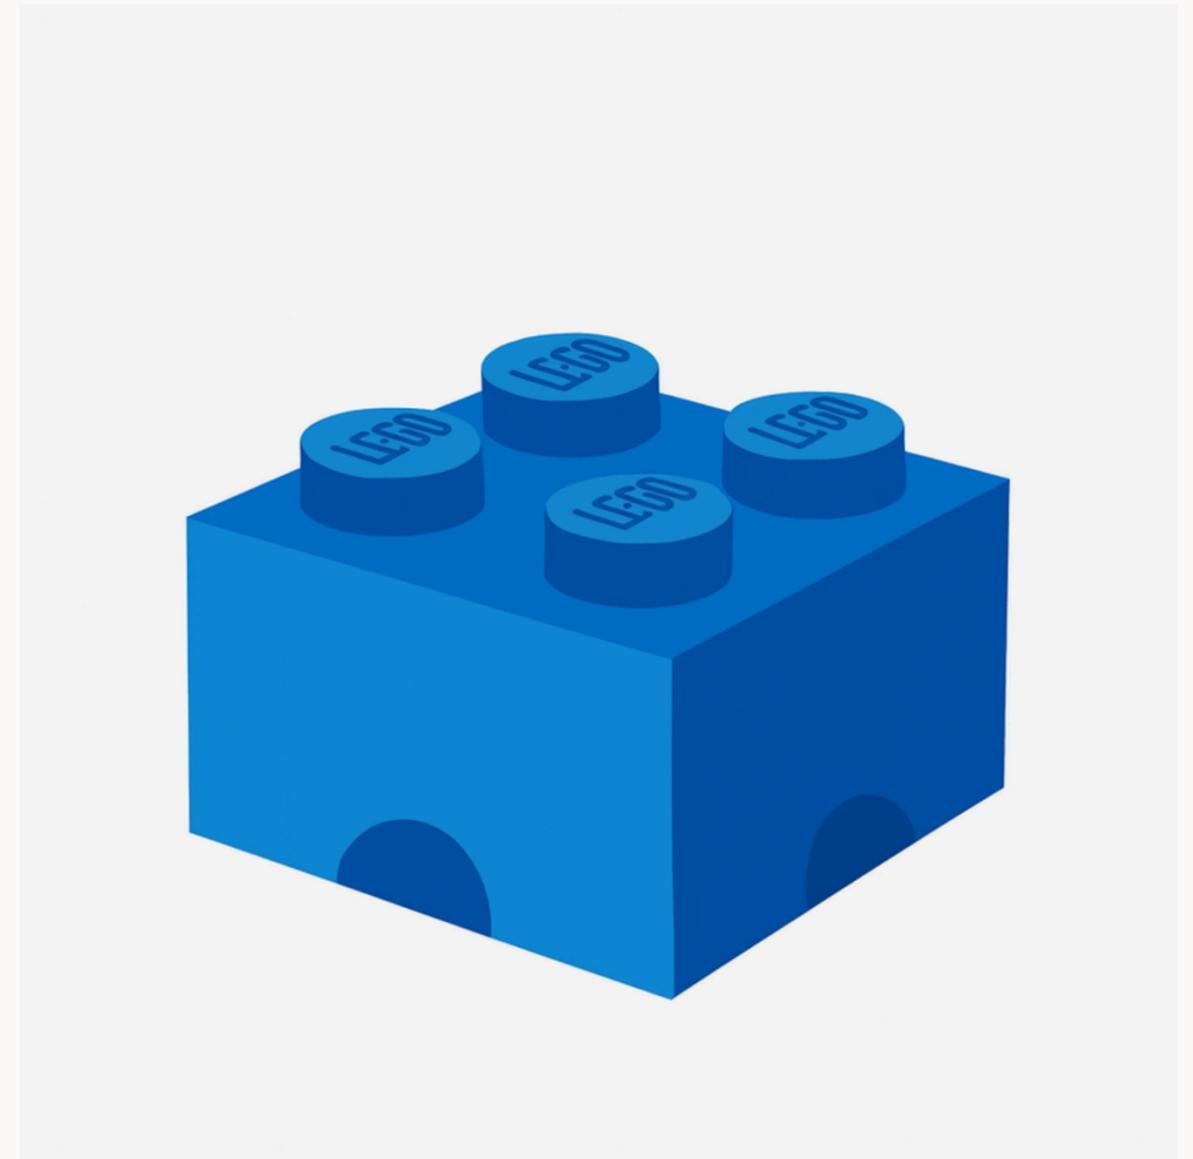

Builders → Open source campaigns → learn our SDKs → create templates/components

Startups → use components to launch faster → Validate use cases

Enterprises → Have use cases → wants to innovate → Needs builders / startups

So...

**Who's building with
Trustless Work?**

Builders:

- **KindFi** – **Crowdfunding** for social impact, SCF grant recipient.
- **Boundless** – **Grants, bounties, and hackathon payouts** in USDC for builders.
- **GrantFox** – Open source **bounty** platform (Only Dust for Stellar).
- **Revolutionary Farmers** – **Private credit** for Costa Rican farmers.
- **OfferHub** – Freelance **Marketplace**
- **Pacto** - P2P decentralized **exchange**.

5 platforms
going live
Q1 2026

Enterprise innovators:

Balescrow – by US group with presence in Latam.

Building: A decentralised escrow service for export-finance.

Pilot launch:

December 2025

Wine export finance

On success: The Group will expand the model from traditional market exports to, ultimately, telecom-tower rentals in Mexico.

Mirai-X

Japan ↔ UAE

Real-estate investment gateway using escrows for capital intake & dealflow

Phase 1: live
\$150M in Assets
Potential revenue:
\$450K

Phase 2: developing
\$3.2B in Assets
Potential revenue:
\$9.6M

The Defiant

Assets Advisors Capital Unveils MIRAI-X, a Decentralized Escrow Platform for Tokenized Landmark Assets

External - Press Release

By: Chainwire • October 09, 2025

Tokyo, Japan, October 9th, 2025, Chainwire

Assets Advisors Capital (AAC), an investment and advisory firm with offices in Tokyo and Dubai, proudly announced the successful launch of MIRAI-X, (The world's first trustless co-partner platform for prime assets.) a decentralized escrow platform built for real-world asset (RWA) tokenization.

Trustless Work

Market Opportunity

\$2T+ stablecoin volume/month → growing double digits every quarter

\$400B+ global fiat escrow flows → still manual & custodial

\$6.6T B2B payments → moving to programmable settlement

\$4.5T marketplaces → need buyer/seller protection

\$37B RWA market → tokenization requires tools to capture capital

\$17B Private credit market → more than half of the RWA

AI & agentic payments → emerging need for programmable trust

The world needs escrow infrastructure that's programmable, neutral, and composable.

Trustless Work

Why now?

**Stablecoins are becoming the default currency of the internet.
Innovators need plug-and-play financial components to innovate safely.**

Blockchain solved how money moves.
Trustless Work is solving how it waits.

Trustless Work
